***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Bilek et al (6,596,044 B1).

Bilek et al teach an electric vacuum cleaner (100) comprising a vacuum cleaner main body with an electric blower (114) housed therein comprising an inlet port (118) and an exhaust port (120), a separating section for separating dust that is sucked therein with air through the intake port (118) driving the electric blower (114) into coast dust and fine dust (see Fig. 4, col. 3, line 50 through col. 4, line 9), a coarse dust air passage into which the coarse dust flows (216) with part of the air (see Fig. 5, col. 5, lines 14-26), a fine dust air passage provided parallel with the coarse dust air passage into which the fine dust flows with the rest of the air, a partition wall (210) positioned between the coarse dust air passage (216) and the fine dust air passage (218), an

opening portion opened in the partition wall (see Fig. 15) along the coarse dust air passage, a first filter (212, col. 5, lines 27-30), a second filter (280) provided on the downstream side of the fine dust passage.
